Matt-

It's an SMA with PTW and capping (with a sliver of dredging) is the current technology assignment.

Subject: Sulzer

Hi Eva,

We just want to confirm that EPA's optimized alternative includes a sediment cap adjacent to Sulzer. Please confirm that we are reading this correctly.

Thanks,

Matt

Matt,

I am following up on our brief discussion regarding proposed EPA remedy in front of Sulzer. Below is a blowup of the area. It is hard to tell, but it looks like there is a proposed cap adjacent to the two purple marks. Is there anyway you can contact EPA and verify that this indeed is a proposed cap?
